Most of the favorable conditions which were operative in the market yesterday were present to-day, and as the doctrine of repudiation did not gain its expected new apostle there was a general disposition among the traders to recover some of the short stock recently sold. The feeling in the room on the political situation was even more confident with the increasing discomfiture of the Bryan managers; and the lower range of prices in London early in the day exerted only a moderate influence, as it was understood that the movementa of the foreign market had been mostly directed from New York. Cable advices later in the day reported an improved tone in the market for American stocks on the encour-aging remarks of Mr. Balfour relative to the outlook for a satisfactory settlement of the Venezuela controversy. The foreign market was also inclined to attach much importance to next week's formal opening of the sound-money

of the advances in prices, and it was held by the specialists in the Grangers that there had been a considerable reduction in the short in-terest. Little buying by commission houses was discernible. An advance in call money rates during the afternoon was chiefly responsible for the concessions from the best prices of the day that were then shown, but after a few nervous borrowers had been supplied the money market was run off again to about the average of the earlier part of the week. The flurry was no more than is often experienced on a Friday when bank reserves are declining. Foreign

exchange was heavy, with a better supply of bills in the market. Some drawers, who had not changed their posted rates for ten days, re-There was little news to affect particular properties. Most of the selling of stocks late in the day was explained by the continued rumors relative to the Louisville, New Albany and Chicago road. In a further statement in reference to the legal difficulties with which the management is confronted, the President of the company sought to acquaint holders of its securities 79% with the exact position of affairs, but this did
79% not prevent liberal offerings of the bonds on a narrow market. Sugar Refining was the leader of the list in point of activity, and closed at a net gain of 1% % cent, on buying by shorts, after receding 36 P cent. from the highest. St. Paul and Burlington and Quincy closed at net gains, though much of the last named stock was offered after the quota-

> extreme advance of 416 % cent. Louisville was the conspicuously weak feature of the international group. The closing, while at general gains, was dull and of small significance.
